- |   |              |                                       |          |
|---|--------------|---------------------------------------|----------|
| Abscisic acid   | 11, 107, 189 | <i>Citrus reticulata</i>              | 211      |
| Acid inorganic pyrophosphatase                            | 189          | <i>Citrus sinensis</i>                | 211      |
| <i>Agaricus bisporus</i>                                  | 51           | <i>Citrus sunki</i>                   | 211      |
| Aflatoxin monoclonal antibody                             | 279          | Classification                        | 235, 295 |
| Algae population  | 245          | Cluster                               | 223      |
| <i>Aloe myriacantha</i> (Haw.) Schult. &<br>J. H. Schult. | 315          | Cold shock proteins                   | 263      |
| Ammonia assimilation                                      | 149          | Conventional-tillage                  | 35       |
| <i>Anabaena</i>   | 285          | <i>Cosmos</i>                         | 291      |
| Anatomy   | 143          | Cyanophyta                            | 245      |
| Angiosperms   | 59           | Cytokinins                            | 291      |
| Aphid transmission  | 7            | Cytokinin changes in leaves           | 291      |
| Ascomatal formation                                       | 175          | Cytoplasmic-genetic male sterile line | 217      |
| Asphodelaceae   | 315          | Degradation                           | 113      |
| <i>Auricularia mesenterica</i>                            | 205          | Developing rice grain                 | 149      |
| Autotoxicity (allelopathy)                                | 35           | <i>Digitaria eriantha</i>             | 143      |
| Azaconazole   | 51           | Dihydrodifurocumrinic moiety          | 279      |
| <i>Bambusa multiplex</i>                                  | 29           | Distortion coefficient                | 129      |
| <i>Bambusa oldhamii</i>                                   | 29           | Ecology of seaweeds                   | 245      |
| Banana bunchy top virus                                   | 7            | 11,14-Eicosadienoic acid              | 35       |
| Banana plantlet   | 7            | <i>Elaphoglossum</i>                  | 305      |
| <i>Bauhinia purpurea</i> Linn.                            | 1            | Embryology                            | 119      |
| Benzyladenine   | 11, 189      | Endopeptidases                        | 19       |
| Biodegradation  | 113          | Endosperm                             | 149      |
| <i>Bolbitis</i>   | 305          | Epidermis                             | 143      |
| Braun-Blanquet method                                     | 235, 295     | Epitope                               | 279      |
| Cell culture  | 29           | Esterase                              | 223      |
| Centric fusion  | 179          | Ethylene                              | 107, 285 |
| <i>Chamaesyce taihsiensis</i> Chaw & Koutnik              | 163          | Flora of China                        | 321      |
| <i>Chamaesyce makinoi</i>                                 | 163          | Flowering duration                    | 217      |
| <i>Chamaesyce prostrata</i>                               | 163          | Fungi                                 | 205      |
| <i>Chamaesyce serpens</i>                                 | 163          | Fusarin C                             | 169      |
| Chilling stress   | 263          | <i>Fusarium moniliforme</i>           | 169      |
| Chlorophyta   | 245          | Glutamate synthase                    | 149      |
| Chloroplasts  | 263          | Glutamate pyruvate transaminase       | 149      |
| Chromosome association                                    | 179          | Glutamate oxaloacetate transaminase   | 149      |
| Citric-acid cycle compounds                               | 35           | Glutamine metabolism                  | 149      |
| <i>Citrus aurantium</i>                                   | 211          | Glutamine synthetase                  | 149      |
| <i>Citrus grandis</i>                                     | 211          | <i>Glycine soja</i> populations       | 129      |
| <i>Citrus jambhiri</i>                                    | 211          | Grassland Biome                       | 235, 295 |
| <i>Citrus limonia</i>                                     | 211          | Guizhou province                      | 321      |
| <i>Citrus macrophylla</i>                                 | 211          |                                       |          |

Heterocyst	285	Nitrogenase	285
<i>Heteropyxis</i>	119	Nonanedioic acid	35
Histochemistry	143	No-tillage	35
<i>Hordeum vulgare</i> L.	107	Nucellar embryo	211
Hsiao-Liuchiu	245	Old wheat straw	35
Hull	149	Oleic acid	35
Internode	217	Onagraceae	321
Interspecific somatic hybridization	179	<i>Oryza sativa</i>	11, 149, 189
<i>Ipomoea batatas</i>	19	Palmitic acid	35
Isozymes	129	Panicle exertion	217
Jew's ear fungus	205	Pectin	273
Kinetin	107	Pectinesterase	273
$\phi$ L7	197	Pentachlorophenol	113
Leaf senescence	11, 189	<i>Pentalonia nigronervosa</i>	7
<i>Leptosphaeria maculans</i>	113	Peroxidase	223
Light	11, 189	Petri dish bioassay	35
Lomariopsidaceae	305	<i>Pestalotia hanseni</i>	175
<i>Lomariopsis</i>	305	<i>Pestalotiopsis</i> sp.	175
<i>Ludwigia</i> $\times$ <i>taiwanensis</i> Peng	343	Phaeophyta	245
<i>Ludwigia adscendens</i>	343	Phenolic deposits	143
<i>Ludwigia peploides</i> subsp. <i>stipulacea</i>	343	Phylogeny	179
<i>Ludwigia</i> sect. <i>Oligospermum</i>	343	Phytochrome	107
<i>Lythraceae</i>	59	<i>Phytophthora</i>	89
Maintainer lines	217	<i>Phytophthora capsici</i>	89
Male sterile cytoplasm	217	<i>Phytophthora citricola</i>	89
Mangrove	175	<i>Phytophthora citrophthora</i>	89
Marine algal flora	245	<i>Phytophthora cinnamomi</i>	89
Mass spectrometry	35	<i>Phytophthora colocasiae</i>	89
Methyl ester content	273	<i>Phytophthora palmivora</i>	89
Methyl-(Z)-9-hexadecanoic acid	35	<i>Phytophthora nicotianae</i> ( <i>parasitica</i> )	89
Methyl jasmonate	107	<i>Pisum sativum</i> seedlings	263
Mg <sup>2+</sup> -dependent alkaline inorganic pyrophosphatase	11	Plant communities	235, 295
<i>Miscanthus floridulus</i>	223	Plant height	217
<i>Musa acuminata</i>	7	Plasticizers	35
Mushroom disease	205	Poaceae	143
Mushroom growing	51	Populations	129, 223
Myrtales	119	Population distance	129
Natural hybridization	343	Properties	19
Nectary	1	Protein accumulation	149
New wheat straw	35	Protoplast culture	29
<i>Nicotiana</i>	179	Pseudobulbil	211
		<i>Pseudohansfordia mycophila</i>	205
		<i>Psiloxylon</i>	119
		Pteridophytes	305
		Purification	19
		Quantitative traits	129

Rhodophyta	245	Tissue culture	211
<i>Rotala</i>	59	Transfection	197
Senescence	107	Trilacunar node	1
<i>Setaria sphacelata</i> var. <i>sphacelata</i>	143	Triploid	343
Setiform conidiophore Hyphomycetes	257	<i>Triticum</i>	35
Soil	35	Typification	315
Sprouts	19	Ultrastructure	263
Stem-node-leaf continuum	1	UV-light	107
Stearic acid	35	<i>Vigna radiata</i>	263
Sugars	35	Virulent phage	197
Synergistic action	35	<i>Xanthomonas campestris</i>	197
Taiwan	89, 163, 205, 245, 257, 305, 343	Wheat	35
Teata-pericarp	149	Wood preservative	51
<i>Themeda triandra</i>	143		

## Table of Contents Volume 31, 1990

### Number 1

<b>R. K. Dubey, K. C. Sharma, A. Pillai</b> Stem-node-leaf continuum in <i>Bauhinia purpurea</i> Linn.	1
<b>R. Y. Wu, H. J. Su</b> Transmission of banana bunchy top virus by aphids to banana plantlets from tissue culture	7
<b>M. S. Lin, C. H. Kao</b> Senescence of rice leaves. XXI. Changes of Mg <sup>2+</sup> -dependent alkaline inorganic pyrophosphatase activity during senescence	11
<b>Y. H. Lin, H. Y. Chan</b> Purification and properties of endopeptidases of sprouts of sweet potato ( <i>Ipomoea batatas</i> L. Lam. cv. Tainong 64)	19
<b>L.-C. Huang, B.-L. Huang, W.-L. Chen</b> Tissue culture investigations of bamboo. V. Recovery of callus from protoplasts of suspension-cultured <i>Bambusa</i> cells	29
<b>R. L. Z. Thorne, G. R. Waller, J. K. McPherson, E. G. Krenzer, Jr., C.-C. Young</b> Autotoxic effects of old and new wheat straw in conventional-tillage and no-tillage wheat soil	35
<b>A. Eicker, E. Strydom</b> An evaluation of azaconazole for the treatment of wood used for <i>Agaricus bisporus</i> mushroom growing trays	51
<b>A. K. Pradeep, K. T. Joseph, V. V. Sivarajan</b> <i>Rotala malabarica</i> , a new species of Lythraceae from India	59
Index of Authors with Running Titles and List of Original Articles, Volume 21 to Volume 30 (January, 1980 to October, 1989)	63
INSTRUCTIONS TO AUTHORS	i

### Number 2

<b>H. H. Ho</b> (Invited review paper) Taiwan <i>Phytophthora</i>	89
<b>J. Cuello, M. J. Quiles, C. Garcia, B. Sabater</b> Effects of light and growth substances on senescence of barley leaf segments at different developmental stages	107
<b>J. S. Dahiya</b> Pentachlorophenol degradation by the fungus <i>Leptosphaeria maculans</i>	113
<b>H. Tobe, P. H. Raven</b> Embryology and systematic position of <i>Psiloxylon</i> (Myrtales)	119
<b>Y. T. Kiang, Y. C. Chiang</b> Comparing differentiation of wild soybean ( <i>Glycine soja</i> Sieb. & Zucc.) populations based on isozymes and quantitative traits	129
<b>J. D. Theunissen</b> Histochemical localization of phenolic deposits in the leaf blades of three grass species from southern Africa.	143
<b>H. F. Yuan, C. C. Hu, H. L. Wu</b> Ammonia assimilation and glutamine metabolism related to protein-accumulation in developing rice grains	149
<b>S. M. Chaw, D. L. Koutnik</b> <i>Chamaesyce taihsiensis</i> (Euphorbiaceae), a new species from Taiwan	163

<b>T. C. Tseng, C. S. Chung, I. Li</b>	
Production of fusarin C mycotoxin by <i>Fusarium moniliforme</i> isolates of Taiwan	169
<b>H. S. Chang, J. M. Chang</b>	
<i>Pestalotiopsis hansenii</i> , the teleomorph of an anamorph <i>Pestalotiopsis</i> sp. on mangrove ( <i>Kandelia candel</i> (L.) Druce) leaves and its ascomatal formation under laboratory conditions	175
<b>Number 3</b>	
<b>R. F. Lin, C. C. Chen</b>	
Cytological studies of interspecific somatic hybrids in <i>Nicotiana</i>	179
<b>M. S. Lin, C. H. Kao</b>	
Senescence of rice leaves XXII. Changes of acid inorganic pyrophosphatase during senescence	189
<b>M.-J. Su, M.-C. Lai, S.-F. Weng, Y.-H. Tseng</b>	
Characterization of phage $\phi$ L7 and transfection of <i>Xanthomonas campestris</i> pv. <i>campestris</i> by the phage DNA	197
<b>A. Eicker, J. T. Peng, Z. C. Chen</b>	
A <i>Pseudohansfordia</i> -disease of sawdust-cultivated <i>Auricularia mesenterica</i> in Taiwan	205
<b>L.-C. Huang, W.-L. Chen, K.-Y. Yeong, B.-L. Huang</b>	
Hormonal requirements for proliferation of pseudobulbils in citrus nucellus cultures	211
<b>S. B. Pradhan, S. N. Ratho</b>	
Studies on internode and certain other characters in relation to cytoplasmic-genetic male sterile lines in rice	217
<b>C. H. Chou, Y. Y. Chen</b>	
Population study of <i>Miscanthus floridulus</i> III. Population variation of <i>M. floridulus</i> in Green and Orchid Islets of Taiwan	223
<b>M. S. Kooij, G. J. Bredenkamp, G. K. Theron</b>	
The vegetation of the deep sandy soils of the A land type in the north western Orange Free State, South Africa.	235
<b>S. F. Huang</b>	
The marine algal flora of Hsiao-Liuchiu island	245
<b>H. S. Chang</b>	
Setiform conidiophore Hyphomycetes from Taiwan	257
<b>Number 4</b>	
<b>S. F. Ma, C. Y. Lin, Y. M. Chen</b>	
Comparative studies of chilling stress on alterations of chloroplast ultrastructure and protein synthesis in the leaves of chilling-sensitive (mungbean) and -insensitive (pea) seedlings	263
<b>T. P. Lin, T. Y. Feng, Y. H. Chung, C. L. Lan</b>	
Quantification of methyl ester content of pectin by pectinesterase	273
<b>T. C. Tseng, C. S. Chung</b>	
A monoclonal antibody recognizing the specific epitope of aflatoxin analogs	279
<b>C. Y. Huang</b>	
Suppression of the nitrogen fixing activity of cyanobacterium <i>Anabaena</i> HA101 by ethylene	285
<b>S. Saha, P. K. Sircar</b>	
Cytokinin changes in the subtending axillary leaves of developing flower of <i>Cosmos sulphureus</i> Cav.	291
<b>M. S. Kooij, G. J. Bredenkamp, G. K. Theron</b>	
The plant communities of the hills and ridges in the north western Orange Free State, South Africa.	295
<b>C. M. Kuo</b>	
Materials for the Lomariopsidaceae of Taiwan	305
<b>G. F. Smith</b>	
Neotypification of <i>Bowiea myriacantha</i> , basionym of <i>Aloe myriacantha</i> (Asphodelaceae: Alooideae)	315

**D. E. Boufford**

The Onagraceae of Guizhou, China

321

**C. I. Peng***Ludwigia* × *taiwanensis* (Onagraceae), a new species from Taiwan, and its origin
